EDUCATION

• Engineering physics

Faculty of Engineering, Lund University (LTH)

September 2018 - Summer 2023

- Specializing in Control theory.

- Exchange in Vienna in the spring of 2022.

• Theoretical philosophy

Lund University

January 2018 - June 2018

EXPERIENCE

• Student worker

Summer 2022

Axis Communications

- Created a web app (Python backend using a framework called Flask) for creating and visualizing collections of data from a database.

• Student worker

Summer 2021, part time October 2021 - February 2022

Axis Communications

- Investigated using a game engine to generate data for machine learning. The project included writing python scripts to interact with the engine and a creating plugin in C++.

• Student tutor

September 2019 - Mars 2020

Lund University, Lund

• Bagage handling

February - August 2017, summer 2018 & 2019

Sas Ground Handling, Arlanda

• Tekniksprånget (internship)

September - December 2016

Sandvik, Västberga

- Wrote a Python script to prepare, analyze and present data from an industrial process.

ADDITIONAL QUALIFICATIONS

• Personal projects

- I enjoy doing small technical projects, for example an XY-rotary platform this winter. I have experience with both RaspberryPI and Arduino.

• Student activities

- During my studies in Lund I have been involved in many student societies, including cooking for Helsingkronaspexet for 3 years, singing in the Ostrachorus student choir and leading a book club for 2 years. I have also been involved in the F-guild.
